MONIRUL HASSAN

Front-end Web Developer

Address: 672/A, Baramaghbazar, Dhaka 1217,

Mobile No: 01711591602

Email: hassan.monirul@gmail.com

Portfolio   **LinkedIn**   **Github**

Objective: Motivated front-end web developer looking to build responsive and user-friendly web applications. Skilled in front- end development, including but not limited to React, Express, and MongoDB. Experiences in building dynamic websites, API integrations. Eager to apply problem-solving skills and technical knowledge to innovative projects that contribute to further growth.

Skills:

1. HTML5
2. CSS3 (Tailwind CSS, daisyUI, flowbite UI,)
3. JavaScript (fundamentals to advanced topics)
4. React JS (React Router, Firebase Authentication, Node JS, Express, MongoDB, JSON Web Token and usage of various plugins to make web development faster and easier)

Projects:

1. Heartsync   **Live link** **Front-end code** **Back-end code**
An online portal for matchmaking and matrimony
Technologies Used: React JS, Firebase Authentication, React Router, Node JS, Express, MongoDB, JSON web Token, Tailwind CSS, Flowbite css, axios, React/TanStack Query, sweetalert2, Helmet, swiper, react icons, Vite.
Admin email : hassan.monirul@gmail.com **Admin password :** 123456

Main Features:

- Users can view biodatas, but registration is required for detailed access. Contact details are only available to premium members or after a $5 fee, with admin approval.
- Registered users can request to upgrade their biodata or become premium members for free, subject to admin approval. Admins can also promote users to admin status.
- Logged-in users can upload or edit their biodata, view their own biodata, and manage contact requests and favorites. Biodata can be filtered by age, gender, and address, and the site includes pagination for browsing.

2. Tourismo   **Live link** **Front-end code** **Back-end code**
An online tourism site for tour program and tour guide management
Technologies Used: React JS, Firebase Authentication, React Router, Node JS, Express, MongoDB, JSON web Token, Tailwind CSS, Flowbite css, axios, React/TanStack Query, sweetalert2, swiper, react icons, Vite.

Admin email : hassan.monirul@gmail.com , **Admin password :** 123456

Main Features:

- Registration is needed to view detailed tour packages and guide info. Logged-in users can book tours and choose guides.
- Once booked, guides can accept or reject tours. Accepted tours appear in the tourist's dashboard with a "Pay" button; pending tours show as "In Review" with a "Cancel" option.
- Tour types are listed on the homepage. Users can add tours to wishlists, write reviews, and view them on the homepage. Admins can promote users to admin or guide, while registered users can request to become guides and update their profiles.

3. Benevo   **Live link**   **Front-end code**   **Back-end code**

An online portal for volunteer program management

Technologies Used: React JS, Firebase Authentication, React Router, Node JS, Express, MongoDB, JSON web Token. Tailwind CSS, Daisy UI, sweetalert2, Helmet, react icons, Vite

Main Features:

- Users can browse volunteer programs, but registration is needed to view details and make volunteer requests. Users cannot volunteer for their own programs.
- Logged-in users can upload programs, manage their posts, and view their activities under "My Profile," which includes adding programs and handling volunteer requests.
- The "Need Volunteer" section displays programs in grid and table views, searchable by name. The site also offers light and dark theme options.
